

required computation and communication

```
def inc(i):  
    return i + 1
```

```
def add(a, b):  
    return a + b
```

```
x = 1  
y = inc(x)  
z = add(y, 10)
```

A **graph** describes the
required computation and communication
for a given program

```
def inc(i):  
    return i + 1  
  
def add(a, b):  
    return a + b  
  
x = 1  
y = inc(x)  
z = add(y, 10)
```
